

Developing Supply Chain Leaders

How to help others reach their full potential

Why do some people achieve great personal success, yet never succeed in building a business or making an impact in their organization?

Leaders can't do it alone. To succeed at the highest levels, they must surround themselves with a team of influencers. Although leaders may see the big picture, they need other leaders at their side to make the picture a reality. The pathway to growing a Supply Chain organization is to grow its leaders.

During this presentation you will be challenged not only to learn about developing Supply Chain leaders but also to take the action steps necessary to invest in the potential leaders around you. You will learn:

- The five levels of leadership
- Why leaders need to reproduce leaders
- The process for turning producers into reproducers

You'll learn principles that have been tested and proven again and again.
